Head Injury Simulation in Road Traffic Accidents

Fábio A. O. Fernandes 2018-04-27 In this work the development of a new geometrically detailed finite element head model is presented. Special attention is given to sulci and gyri modelling, making this model more geometrically accurate than others currently available. The model was validated against experimental data from impact tests on cadavers, specifically intracranial pressure and brain motion. Its potential is shown in an accident reconstruction case with injury evaluation by effectively combining multibody kinematics and finite element methodology.

The God of Driving Amy Fine Collins

2004-08-24 A style journalist for Vanity Fair recounts her decision to overcome a long-time phobia of driving, describing how she took lessons from an exotic Turkish instructor who harbored a mysterious past and an obsession with all things automotive. 50,000 first printing.

Engineering and Technology Michael Hacker

2015-04-03 Driven by the Standards for Technological Literacy, this National Science Foundation-sponsored book is written by national leaders in engineering and technology education and addresses the most contemporary technological content using engaging, pedagogically sound "informed design" activities.

This unique approach encourages students to develop a thorough understanding of engineering and technology before they ever attempt to develop detailed design solutions. The activities present students with a design problem, and prompt students to begin the solution-finding process with research, inquiry, and analysis. Only after this important step can students begin to discuss specifications and constraints, propose alternatives, and select an optimal design. This process fosters a strong student-teacher discourse and cultivates language proficiency, both with the end result of enhancing student's overall knowledge. Testing, evaluation, and modifications are addressed next, followed by a communication of achievements in a class presentation and final design report. Woven throughout the text are passages that will acquaint students with the requirements, responsibilities, necessary personal attributes and attitudes, and educational pathways that will lead to success in the various technological areas.
