Knowledge Integration and Innovation Christian Berggren 2013-01-24 Technology-based firms continue to compete primarily on innovation, and are continuously required to present new solutions to an exacting market.

Innovation processes have progressively become interdisciplinary, collaborative, inter-organizational, and international, and a firm's ability to synthesize knowledge across disciplines, organizations, and geographical locations has a major influence on its viability and success. This book demonstrates how knowledgeintegration is crucial in facilitating innovation within modern firms. It provides original, detailed empirical studies of prerequisites, mechanisms, and outcomes of knowledge integration processes on several organizational levels, from key individuals, projects, and internal organizations, tocollaboration between firms.
