The Prologue Alexander V. Mirtchev 2021-03-09 This is not another alternative energy study. Rather, The Prologue identifies and charts the security-related trajectory of a relatively new global phenomenon: the ascent of alternative energy as a 21st century megatrend. Why and how have contemporary alternative energy developments evolved into a 21st century global socio-political and techno-economic megatrend? What are the security implications of this megatrend? And what does the megatrend's evolution reveal about upcoming geopolitical, energy, defense, environmental, and economic security challenges? This book endeavors to answer these questions by establishing the conceptual framework of a universally securitized world in which mutually interacting threats have expanded the needs and security considerations of today's globalized and interdependent actors, including states, international organizations, multinational corporations, and political and social movements. "Alexander Mirtchev's sweeping exploration of the changing energy landscape looks far into the future and outlines issues that will occupy scholars and policymakers for decades to come."—The Hon. Henry Kissinger, Chairman, Kissinger Associates, Former Secretary of State and National Security Advisor "With the advancements in alternative energy technology at the beginning of the 21st century, energy security thinking and planning will never be the same—Alexander Mirtchev's profoundly original book reveals these new dilemmas that will challenge policymakers in all major economies and provides for dealing with the new realities in a smart way."—The Hon. Water productivity in context: the experiences of Taiwan and the Philippines over the past half-century Barker, R. As we enter an era of increasing water scarcity, there is a growing interest to find ways to capture and put water to more productive uses. Substantial increases in the productivity of water in agriculture are needed to meet the demands for food and ensure environmental security, and to satisfy the demands for non-agricultural uses. However, increasing water productivity in rice-dominated agriculture is a function of the irrigation infrastructure, advances in rice-plant breeding, and the physical, institutional and socioeconomic environments. This paper first describes the potential ways in which increased water productivity can be achieved in the context of rice production in Asia. It then illustrates the ways in which the differences in the environmental context affect the ability to increase water productivity, the approaches used and the incentives to do so. This is

explained using two 'case studies' reflecting the experiences of Taiwan and the Philippines over the past half-century.

Der lange Weg zur Freiheit Nelson Mandela 2014-01-25 »Ich bin einer von ungezählten Millionen, die durch Nelson Mandelas Leben inspiriert wurden.« Barack Obama Eine fast drei Jahrzehnte währende Gefängnishaft ließ Nelson Mandela zum Mythos der schwarzen Befreiungsbewegung werden. Kaum ein anderer Politiker unserer Zeit symbolisiert heute in solchem Maße die Friedenshoffnungen der Menschheit und den Gedanken der Aussöhnung aller Rassen wie der ehemalige südafrikanische Präsident und Friedensnobelpreisträger. Auch nach seinem Tod finden seine ungebrochene Charakterstärke und Menschenfreundlichkeit die Bewunderung aller friedenswilligen Menschen auf der Welt. Mandelas Lebensgeschichte ist über die politische Bedeutung hinaus ein spannend zu lesendes, kenntnis- und faktenreiches Dokument menschlicher Entwicklung unter Bedingungen und Fährnissen, vor denen die meisten Menschen innerlich wie äußerlich kapituliert haben dürften.
