Networking Quality of Service and Windows Operating Systems Yoram Bernet 2001 Windows Operating Systems and Quality of Service Networking provides an overview of Quality of Service technologies, and how they can be implemented in a Windows based system. Author Yoram Bernet is a leading authority on Quality of Service, having been one of the main architects of many QoS technologies in the IETF and a Program Manager for QoS at Microsoft. With the rapid increase in network traffic, network professionals have been scrambling to add capacity to their networks. But new applications, such as multimedia, keep driving up the demand for network services, and network traffic continues to increase. Quality of service technologies improve this situation by making efficient use of network capacity and giving you, the network professional control over how network capacity is allocated to various applications and users. This book explains the myriad QoS technologies that play a role in a QoS enabled network, with a focus on how to implement these technologies within Windows.

Win32 Perl Scripting Dave Roth 2001 Scripting has become an enormously popular method of managing and maintaining Windows NT and 2000 networks—as evidenced by the success of Windows NT Shell Scripting, which has sold over 30,000 copies in 2 years. Simpler than programming, yet allowing greater complexity and utility than packaged network management tools, scripting is now the tool of choice by many of you network administrators. Perl is yet another powerful element of the scripting arsenal, yet since it has been ported to the Windows environment, very little information has been published on how to employ this extremely effective tool. Win32 Perl is so powerful that it can accomplish virtually any task that you may want to perform. Dave Roth, prolific creator of Win32 extensions, is prepared to share his unique insight into how these tasks can be accomplished and provide scripts that can be immediately employed. This book illustrates how Perl can automate many current mundane administrative tasks.
