Intercultural Public Relations Lan Ni 2018-06-12 Intercultural Public Relations: Theories for Managing Relationships and Conflicts with Strategic Publics develops a coherent framework to unify the theories of public relations and intercultural communication, and, within the framework, examines empirical studies of intercultural interactions. This book follows an intercultural approach, which considers how individuals and entities with dissimilar cultural identities interact and negotiate to solve problems and reach mutually satisfying outcomes. This work provides a theory-driven, empirically supported framework that will inform and guide the research and practices of intercultural public relations. Furthermore, it provides numerous levels of analysis and incorporates the use and challenges of social media. The book examines theories and issues in three integrated processes: Identification of publics Relationship management Conflict resolution These areas represent the most critical functions that public relations contributes to organizational effectiveness: scanning the environment, identifying strategic publics, and building long-term, quality relationships with these publics to reduce costs, gain support, and empower the publics themselves. In doing so, the book adopts simultaneously public-centered and organization-centered perspectives. This unique work will serve as an essential reference for students, practitioners, and scholars in today's global public relations environment.

Theory in Social and Cultural Anthropology R. Jon McGee 2013-08-28 Social and cultural anthropology and archaeology are rich subjects with deep connections in the social and physical sciences. Over the past 150 years, the subject matter and different theoretical perspectives have expanded so greatly that no single individual can command all of it. Consequently, both advanced students and professionals may be confronted with theoretical positions and names of theorists with whom they are only partially familiar, if they have heard of them at all. Students, in particular, are likely to turn to the web to find quick background information on theorists and theories. However, most web-based information is inaccurate and/or lacks depth. Students and professionals need a source to provide a quick overview of a particular theory and theorist with just the basics—the "who, what, where, how, and why," if you will. In response, SAGE Reference plans to publish the two-volume Theory in Social and Cultural Anthropology: An Encyclopedia. Features & Benefits: Two volumes containing approximately 335 signed entries provide users with the most authoritative and thorough reference resource available on anthropology theory, both in terms of breadth and depth of coverage. To ease navigation between and among related entries, a Reader's Guide groups entries thematically and each entry is

followed by Cross-References. In the electronic version, the Reader's Guide combines with the Cross-References and a detailed Index to provide robust search-and-browse capabilities. An appendix with a Chronology of Anthropology Theory allows students to easily chart directions and trends in thought and theory from early times to the present. Suggestions for Further Reading at the end of each entry and a Master Bibliography at the end guide readers to sources for more detailed research and discussion.

Supporting Research Writing Valerie Matarese 2012-11-06 Supporting Research Writing explores the range of services designed to facilitate academic writing and publication in English by non-native English-speaking (NNEs) authors. It analyses the realities of offering services such as education, translation, editing and writing, and then considers the challenges and benefits that result when these boundaries are consciously blurred. It thus provides an opportunity for readers to reflect on their professional roles and the services that will best serve their clients' needs. A recurring theme is, therefore, the interaction between language professional and client-author. The book offers insights into the opportunities and challenges presented by considering ourselves first and foremost as writing support professionals, differing in our primary approach (through teaching, translating, editing, writing, or a combination of those) but with a common goal. This view has major consequences for the training of professionals who support English-language publication by NNEs academics and scientists. Supporting Research Writing will therefore be a stimulus to professional development for those who support English-language publication in real-life contexts and an important resource for those entering the profession. Takes a holistic approach to writing support and reveals how it is best conceived as a spectrum of overlapping and interrelated professional activities Stresses the importance of understanding the real-world needs of authors in their quest to publish Provides insights into the approaches used by experienced practitioners across Europe

Getting Culture Regan A. R. Gurung 2020-05-28 How do we educate our students about cultural diversity and cultural differences, and eliminate cultural ignorance, stereotyping, and prejudice? What are the conceptual issues involved in reaching this goal? How can we integrate these perspectives in disciplinary and diversity courses, and the curriculum? This book is a resource for answering these questions. Within the framework of current scholarship and discussion of essential concepts, it offers practical techniques, and empirically proven "best practices" for teaching about diversity. The book opens with a conceptual framework, covering such issues as distinguishing teaching to a diverse audience from teaching about diversity and contrasting the incorporation of culture across the curriculum with tokenistic approaches. Subsequent chapters identify classroom practices that can optimize students' learning, especially those from culturally diverse backgrounds; describe feminist principles of education that promote learning for all students; and address principles of effective on-line instruction for diverse populations. The book is intended for faculty integrating diversity into existing courses, and for anyone creating courses on diversity. The ideas and suggestions in the text can be incorporated into any class that includes a discussion of diversity issues or has a diverse student enrollment. The contributors offer pragmatic and tested ways of overcoming student misconceptions and resistance, and for managing emotional responses that can be aroused by the discussion of diversity. The editors aim to stimulate readers' thinking and inspire fresh ideas. The book further provides teachers of diversity with a range of effective exercises, and attends to such issues as teacher stress and burnout. This book can also serve to inform and guide department chairs and other administrators in the design and implementation of diversity initiatives.

Handbook of Research on Consumption, Media, and Popular Culture in the Global Age Ozgen, Ozlen 2019-05-15 The mass production and diversification of media have accelerated the development of popular culture. This has started a new trend in consumerism of

desiring new consumption objects and devaluing those consumption objects once acquired, thus creating a constant demand for new items. Pop culture now canalizes consumerism both with advertising and the marketing of consumerist lifestyles, which are disseminated in the mass media. The Handbook of Research on Consumption, Media, and Popular Culture in the Global Age discusses interdisciplinary perspectives on media influence and consumer impacts in a globalizing world due to modern communication technology. Featuring research on topics such as consumer culture, communication ethics, and social media, this book is ideally designed for managers, marketers, researchers, academicians, and students.

Crosscultural Transgressions Theo Hermans 2014-07-10 *Crosscultural Transgressions* offers explorations and critical assessments of research methods and models in translation studies, and points up new questions and directions. Ranging from epistemological questions of description and historiography to the politics of language, including the language of translation research, the book tackles issues of research design and methodology, and goes on to examine the kind of disciplinary knowledge produced in translation studies, who produces it, and whose interests the dominant paradigms serve. The focus is on historical and ideological problems, but the crisis of representation that has affected all the human sciences in recent decades has left its mark. As the essays in this collection explore the transgressive nature of crosscultural representation, whether in translations or in the study of translation, they remain attentive to institutional contexts and develop a self-reflexive stance. They also chart new territory, taking their cue from ethnography, semiotics, sociology and cultural studies, and tackling Meso-American iconic scripts, Bourdieu's constructivism, translation between philosophical paradigms, and the complexities of translation concepts in multicultural societies.
