**Transportation Management with SAP TM 9** Jayant Daitthankar 2014-08-07 The implementation of a TMS solution is a highly complex and mission critical project. If executed correctly a good TMS can deliver a number of benefits to the organization in terms of optimization, greater efficiency, reduced errors and improved revenue through accurate invoicing. However a number of projects fail to realize these benefits for a host of reasons such as an incorrect product selection, over customization of the system and lack of detailed processes. The evaluation and selection of the right transportation management system is a very critical step in the successful implementation of a TMS product as well as ensuring that the organization is able to realize the benefits expected from the system. Transportation Management with SAP TM 9 is a guide for CIO/CXOs evaluating options for various transportation management solutions available in the market and helps inappropriate decision making before committing investment. A proven evaluation framework and guidance provided in the book can help decision makers with product selection and help to create a business case for management approval and design a future roadmap for the organization. The book provides a comprehensive understanding of what SAP transportation management is and is useful for teams involved in TM Implementation and roll outs to ensure preparedness. The book explains end-to-end freight life cycle processes, functional system landscape, implementation challenges and post go-live precautions required to optimize investments in SAP TM. Transportation Management with SAP TM 9 also acts as a step by step implementation guide with details of configuration required to set up a TM9 system. This book also covers the upgrade of SAP TM8 to SAP TM9 which will be useful for existing clients who are on TM 8. Nonavailability of SAP TM skilled resources is a major challenge faced by organizations and the book provides a detailed competency building plan along with skill set requirements to create a competent and trained workforce to manage-transformation.The current book available in the market on SAP TM is based on Version 6 release which does not cover air freight processes. Our book covers end-to-end air freight configuration scenarios for logistic companies.

Once the steps in implementation is finished it is necessary to ensure that all the activities are performed in accordance. As such the book provides in guided steps by step approach to verify the same which we call it as SAP FICO Audit Process. The post implementation or SAP FICO Audit Comprises of a widespread listing of important business process perils, along with commonly acknowledged information technology objectives and recommended regulators to meet the objectives.Finally, a set of step by step functions performed by End User exercise are provided for practice. The Book is Unique in the sense that it deals with all three types of training needed for a SAP FICO Professional. Without having a clear idea of Settings in FICO other Modules Learning is ineffective.The book provides Implementation guidance through Explanation of why each task is performed and the key tables in SAP associated with each step.What you will learn?1.The Book Initially takes you through Logistics Management which is the base of all Business Process and since almost everything comes under Logistics.2.Further It Gives You Clear Understanding of ERP and ALL the SAP functionalities available in simple layman's Language.

3.Provides you with a virtual firm's SAP R/3 FICO Step by Step Full Implementation Guide.4.Most of the Materials do not help you in implementation in a sequential method. This book carries you with a sequential step such as in a particular order.5.The Book also helps you to practice exercise at end of almost every sessions6.Most of the tutorials that exist in online do not explain the concepts.7.It guides you with End User Training in FICO. POST IMPLEMENTATION SAMPLE Control ObjectiveCompany codes employed in the system should be set to productiveControl DescriptionIn case of post go-live actions, there are some configurations that must be turned on to replicate that the SAP system is active for use and to protect the data that has been transferred to the production system.In a normal SAP recommends, the functioning company codes should be marked as productive, as soon as the implementation happens. This configuration specifies and endorses the active status of the company code and by default would limit the unsanctioned changes, comprising data deletion in the production server.RiskHere the risk is mistaken deletion of master & transactional data, which will unfavorably influence the system reliability.Test StepsHere we check the global company code configuration to confirm if the appropriate company codes are marked as Productive. For This Follow Step15.1.1. We can see that Company code B100 is not Productive as such to make it productive follow the steps in 15.1.2. *Demand Management with SAP* Christopher Foti 2009-09 The book is the first resource that managers and business leaders need to understand and effectively use SAPs demand management tools. It reviews the SAP strategies and business processes of demand management, while teaching how to configure the relevant SAP solutions. This book will answer the question, What is demand management from the SAP perspective? and then explain how to use SAP APO and other key solutions to manage it effectively.
